

Editorial and publishing policies

Before submitting a manuscript to the journal "*Advanced Biomaterials and Devices in Medicine*" the corresponding author should ensure that all authors have agreed with the proposed changes and with the order of authors in a list, and approved the manuscript submission to the journal. The corresponding author is responsible for managing all communication between the journal and all coauthors, before and after publication. The responsibility of the corresponding author also includes: (1) to ensure that original data lying at the basis of the submission is preserved and retrievable for reanalysis; (2) to approve data presentation as representative of the original data; and (3) to foresee and minimize obstacles to the sharing of data, materials, algorithms or reagents described in a paper.

The corresponding author of published material should inform the journal promptly if the authors decide to correct any part of the paper. It is preferable that requests for corrections be accompanied by a signed agreement of the corresponding author (as a scanned attachment to an email).

Editors of *Advanced Biomaterials and Devices in Medicine* consider the submitted manuscript and all communication with authors and referees as confidential. Authors must also consider communication with the journal as confidential. Correspondence with the journal, reports of reviewers and other confidential information must not be posted on any website or otherwise disclosed without prior permission from the editors, whether or not the submission is eventually published.

Advanced Biomaterials and Devices in Medicine requires that authors must declare all competing interests relating to their work. A "competing interests" section must be included at the end of each manuscript with the list of all competing interests. In case of no competing interests, the author(s) declare(s) to have no competing interests.

Editors and reviewers must also declare any competing interests. In case if a competing interest exists, they will be excluded from the peer review process.

Authors may suggest independent reviewers for their submitted manuscripts, though the journal may or may not follow these suggestions.

Authors affiliated to pharmaceutical or other commercial companies that sponsor clinical trials must declare these as competing interests on submission. The authors should also observe the responsible and ethical aspects of the research to be published. *Advanced Biomaterials and Devices in Medicine* will not publish "advertorial" content.

Advanced Biomaterials and Devices in Medicine receives only original materials, not published or submitted for publication elsewhere. In case of re-using a figure or figures published elsewhere or copyrighted, the author must provide documentation confirming that the previous publisher or copyright holder has permitted to re-publish the figure(s).

All research papers and other types of papers published in *Advanced Biomaterials and Devices in Medicine* are comprehensively peer reviewed. Peer review is usually carried out by two independent peer reviewers. The journal operates a closed peer review system.
